# CITY MULTI

## AC NEILSEN

## Markham Ontario Canada.

AC NEILSEN in Markham Ontario used S-Series City Multi units to cool the computer equipment rooms for the buildings new extension.

Mitsubishi Electric Canada HVAC Technical staff overseeing the proper commissioning and handover of their City Multi equipment

AC Nielsen a global leader in market research information and analysis is using City Multi in their building in Markham Ontario.

Four PUMY-125VM variable refrigerant volume condensing units were used with PCFY-125VGM-A ceiling suspended and PKFY-P100VFM-A wall mounted evaporator units. Indoor unit capacity control is possible from 25 to 100% making future expansion of computer equipment easy. The condensing unit variable refrigerant flow compressor simply adapts to the loads in question.

One of the City Multi PCFY evaporator units installed at AC Nielsen.

Computer Equipment rooms are one of the many applications for City Multi.
